# Pergola SO!

reddot design award  
winner 2019

Take your living room outside with Pergola SO!. You can stay out in comfort at any time of day, and more than that; you can pick the mood and setting you want.

The Pergola SO! brings people together. It is always there for you, whatever the mood or occasion. Experience wonderful moments here with your family and friends as you create countless invaluable memories together.

The SO! patio canopy is not only extremely functional, but also pleasing to the eye. And this was also noticed by the jury of the Red Dot Design Award, Winsol even won this prestigious award.

-  Automatic louvres
-  One app controls everything
-  LED mood lighting
-  LED starry sky
-  Bluetooth sound system
-  USB charging point
-  230V socket
-  Heating
-  Decorative walls

"Create the perfect atmosphere in your garden."

Monitor & control your SO! with the SO! Connected™ app.

Learn more about the app on page 24.

## A place for family & friends to gather.

“Get more out of your terrace  
thanks to the Pergola SO!”

Turn your patio into an extension of your living room. Snuggle cosily into your seat with the two of you or have pre-dinner drinks with the whole family: your Pergola SO! will become a second home. Find out for yourself.

# Three different Pergola SO! packs

### SO! Cosy

Turn your patio into a blissfully comfortable cocoon. Let the summer breeze gently caress your cheek, create shade as needed or escape the rain together under your Pergola SO! Bask in those evocative moments with your family or friends in a very special setting on beautiful summer days and long summer evenings.

### SO! Chic

Relax in a serene, cosy or festive atmosphere and let your imagination roam freely. Make the LED lighting brighter or mellower in accordance with your wishes as music plays from the speakers. Elegance and audacity combine harmoniously to create the perfect atmosphere for the sharing of precious moments.

### SO! Star

Be adventurous... Under the Pergola SO! Star you'll feel like you've entered another world. Experience the magical tranquility of a starlit sky. A motorised system adjusts the automated louvres throughout the day, entirely in accordance with your chosen settings. Let yourself be transported to a lovely warm climate at any season thanks to heating, background music and low lighting. Sit down and luxuriate in the unparalleled comfort of your Pergola SO!

Learn all about the three packs on page 27.

# SO! Refreshing

“Your home.  
All year round.”

How wonderful would it be if you controlled the weather? To always maintain your own micro-climate in your own home and garden. The Pergola SO! adapts to all weather conditions with its adjustable louvres and decorative walls.

On warm summer days, you'll imagine yourself on a sun-drenched beach with a refreshing sea breeze. In the wintertime, your patio's integrated heating will keep you as cosy as in your living room.

Louvres create a natural bio-climate thanks to the breeze passing through.

The louvres automatically assume the correct position using pre-programmed scenes in the app.

Louvres close automatically in case of rain or snow. No water penetrates.

Always enough shade because the louvres automatically follow the position of the sun.

Whether you're in the city or the country, our pergolas provide all the comfort you could ask for.

# SO!

Outdoor luxury  
Enjoy life  
Design  
Feel good

# SO! Bright

“Small, bright LED lights provide instant atmosphere.”

You determine the mood for the Pergola SO!  
This can be done by adjusting the positions of the louvres and screens, or by adding scenic LED lighting.

Warm lighting for a lovely evening with a glass of wine in the garden, or something brighter, so you can comfortably enjoy your book on the patio? Anything goes.

💡 Dimmable LED strip with direct (warm) white lighting

💡 Dimmable LED strip with direct white lighting: adjustable cool - warm white

💡 Indirect RGB lighting

🌟 Dimmable spots in the louvres and/or crossbeams

☆ Starry sky with LEDs

# SO! Music

“Listen to your favourite  
playlist underneath the SO!”

A fun evening is even more enjoyable with the right music. Our ingenious system allows you to easily link your smartphone to the Pergola SO! using Bluetooth.

With your best friends, good food, a nice drink and some music to set the scene, you have everything you need.

**SO! Spotify playlist**

**Winsol pre-dinner drink**

Set the mood for a long,  
cosy evening.

**Winsol Sunset**

The perfect mood  
for a successful party.

# SO!

Breakfast  
Lunch  
Appetiser  
Dinner

# SO! Easy

“Every comfort at your fingertips.”

Just switch on the 2600W capacity infrared heating when it starts to cool down and snuggle into a pile of soft pillows and blankets. Instant cosiness guaranteed!

And thanks to the USB and 230V sockets that have been subtly integrated into the Pergola SO!, every comfort is at your fingertips.

We can also equip your patio canopy with a projector. This projector can also easily be added afterwards. Perfect for a cosy evening while watching a film in your garden. We provide the projector, all you need to do is enjoy it.

# SO! Authentic

“Wood finishes for a warmer feeling.”

The Pergola SO! combines exceptional technology with tasteful design. Choose a rustic look using louvres with a wood-look finish underneath and a RAL colour on top. Thanks to these finishes, the ceiling looks like a real wooden roof and immediately immerses you in an exceptionally pleasant atmosphere. With three types of wood finishes to choose from, there is sure to be something perfect for you.

Oak nature

Oak light grey

Oak dark brown

The atmosphere in your pergola is completely in tune with your mood as the fully automated louvred roof helps you relax under a starry sky of white led lights as the sun sets outside. An excellent evening is guaranteed!

## Your style, your colour

The Pergola SO! is available in three standard colours:

signal white  
(RAL 9016 ST)

anthracite grey  
(RAL 7016 ST)

jet black  
(RAL 9005 ST)

## Would you prefer a different colour?

Have your Pergola SO! or the louvres made in a **RAL colour of your choice**.

# SO! Heaven

“ Small, bright LED lights  
provide instant atmosphere.”

Our Pergola SO! is also a great place to spend a twilit evening. Recline, relax and drift away as dozens of twinkling LED lights create a dazzling starry sky. A good night's sleep? Check!

# SO! Connected

“Connect your smartphone or tablet using Bluetooth and relax.”

With the SO! Connected™ app you create your own gorgeous weather. Using the patented, intelligent louvre system, the app calculates the correct position for the aluminium louvres. Any change in incoming light causes the louvres to adjust automatically maintaining the perfect ambiance on your patio.

Natural bio-climate. The wind moves between the louvres to create a natural breeze.

Sunny day. The louvres move along with the sun for an optimal sun/shade ratio.

Your favorite music always at your fingertips. Use Bluetooth to link your playlist and enjoy.

Sunny day with strong wind. Control the wind-resistant screens with the app to keep out the breeze.

Changeable day. Pergola closes when it rains. When the sun comes out again the louvres re-open.

Evening mode. Turn starry sky and LED lights on or off and select warm or cool lighting.

Would you rather use a remote control? This is also possible on request.

# SO! Smart

Connect your smartphone to your Pergola SO! using Bluetooth and easily adjust the position of the louvres or control the louvres on your SO! manually using the built-in buttons in the framework.

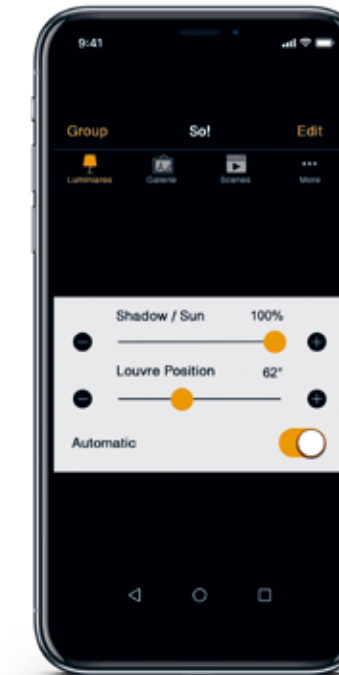

Each set of 4 metal design buttons (optional) is outlined with a circular ring of LED lighting.

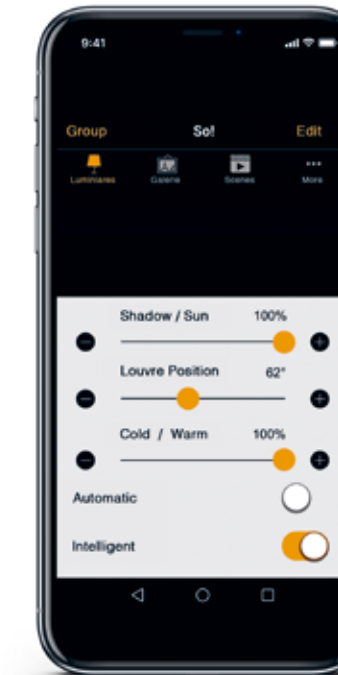

SO! Cosy

Perfect for people who like to be in control: you can set the extent to which the louvres open yourself. Use a slider to determine the desired position (between 0° and 145°) by moving the louvre position from left to right. You can easily make adjustments to the angle of the louvres using the designer-controls in the support pole.

SO! Chic

We have the perfect solution for people who want to enjoy the outdoors to the full-est. Set the engine controls to automatic and choose the desired level of shadow/sun on your patio. The **solar tracker** and your geolocation operate in tandem, causing the louvres to move spontaneously and automatically adjust to the position of the sun. If you'd rather adjust the amount of sunlight or shadow manually, you can do so with the optional, integrated, designer control panel in the pergola.

SO! Star

Do you want to enjoy your patio throughout the year? You can set the outdoor climate yourself thanks to the **patented and intelligent motor control system**. The desired level of sunshine admitted to your patio is determined using a temperature and solar sensor to transform the Pergola SO! into the ultimate place to enjoy the day. The louvres adjust automatically throughout the day to make sure you do not need to worry about a single thing. Otherwise, of course, you can change the angle of the louvres whenever and to whichever angles you want with the optional designer buttons.

# Discover the new louvres: Climate

Increase the wind resistance of your Pergola SO! with the new patented Climate louvres. These bioclimatic louvres not only rotate – in closed position they also rest fully on the gutter profiles so that the roof is completely draft-free. And thanks to the sound-absorbing foam inside, the sound of the rain is much less noticeable.

## New living space, between a pergola and a conservatory

Meet the “Peranda”, a hybrid concept that gives you all the advantages of a real conservatory without the overheating and the greenhouse effect. Tilt the louvres and the hot air makes way for a cooling breeze. This way, you can continue to enjoy your extension in the summer. Complete your Peranda with our insulating glass walls for extra heat and sound insulation. Discover them on page 44.

### 01. Classic louvres

The water-resistant louvre with solar shading.

### 02. Climate louvres

The sound-insulating louvre that is not only water-resistant but also completely wind-resistant.

# SO! Sheltered

## Decorative walls

Discover our wide range of side walls for your personal Winsol outdoor space. Sleek and modern, romantic, rural or even industrial... Decorative walls transform your pergola into every possible style so that it always matches your home. Sit outside for longer, away from the UV rays of the sun, rain, wind and cold.

## Built-in SolFix screens

SolFix screens are the most popular option for closing off a Pergola SO!. The fibre-glass screen fabric is available in **more than 50 colours** and offer you different advantages. For example, thanks to the different opening degrees of the fabric (1% - 5% - 10%), you can create a cool and shady cocoon under your pergola with natural light. And with excellent wind resistance of up to 6 Beaufort, you are protected from the sun even on a windy day.

Not using the screens for a while? Then they can be integrated into the structure of the pergola and made completely invisible. And when fully closed, the screens also keep out mosquitoes and other annoying insects. In short, multiple functions in one partition.

**Choose from  
42 more  
colours**

Built-in SolFix screen

Thermowood wooden sliding wall

Verso-Tex sliding wall with screen fabric

## Sliding wall with wood or screen fabric

The Thermowood wooden sliding wall gives your Pergola SO! a welcoming look. Wood is therefore a popular choice for a charming and cosy finish, regardless of the style. The lengthy heating process changes the chemical structure of the wood, making it highly resistant to moisture, bacteria and insects. It also means that Thermowood sliding walls are extremely robust and easy to maintain. These are available with one side in wood and one side in screen fabric or both sides in screen fabric (Verso-Tex).

The Verso-Tex system also has the same sliding frame, but with a fibre-glass screen fabric on the inside and outside. These screens are welded to the sides of the walls and offer extra privacy or protection from sun and wind.

## 10mm glass sliding walls

Enjoy an unobstructed view of your surroundings thanks to the sliding walls with 10mm-thick glass panels. Slide the panels open to provide more access or ventilation. Combine them with the built-in SolFix screens to prevent overheating and to regulate the light level under your pergola. And if you're looking for an authentic or industrial look, you can opt for the steel-look version with aluminium lattice dividers on both sides of the glass.

Glass sliding walls

Steel-look glass sliding walls

## Louvred Ambiente wall design

The Ambiente wall with vertical louvres has a modern and sleek design that gives you a real feature wall under your Pergola SO! Open and close the louvres manually or automatically for more or less ventilation and/or privacy.

Oak nature

Oak light grey

Oak dark brown

Finish the louvres with a **wood look** for a cosy touch and adjust **the integrated white or RGB LED lighting** to create the perfect atmosphere. More inspiration on page 12.

All RAL colours also possible!

Louvred Ambiente wall

## Outdoor curtains

A romantic and homely touch for your pergola? Our outdoor curtains are not just designed to protect you from the sun, wind and rain but also to give you greater privacy. You can choose from a **variety of 58 colours** and designs, all with a 5-year warranty. This means that they can withstand the most extreme conditions. Incidentally, the colours stay incredibly vibrant year after year!

Outdoor curtains

## Perspective: motorised lifting wall

For an unobstructed view, choose the motorised Perspective lifting wall. Thanks to the vertical lifting system, you can open or close the top 2 sections to ventilate your outdoor space more in the summer or keep the heat inside in winter. The lower part is fixed and marks the **boundary** of your pergola or terrace **at balustrade height**. The Perspective lifting wall is ideal for hospitality use and enables you to expand your terrace and outdoor seating area.

Perspective lifting wall

## Insulating walls

Did you know that you can increase the thermal and acoustic insulation level under your pergola when you have fixed or sliding **double-glazed** windows? Connect with your garden with **aluminium exterior joinery** similar to that in your home and enjoy the same comfort as indoors. Your pergola is the result of our years of experience with windows and solar shading and combines the best of these 2 worlds. And this is **unprecedented in the market!**

Combine the insulating glass walls with built-in SolFix screens and/or curtains on the same side.

Wind-resistant screens

Projector

## Bluetooth sound and projection

An amazing entertainment space. Enjoy the high-end sound from the stylishly integrated speakers. These are almost invisible, and you can easily operate them with the app.

You can also project your favourite films, series or sports events in big-screen format using the projector holder\* and projection screen. Transform your pergola into your own outdoor cinema with real surround sound.

\*Projector not included

Wood-look louvers with integrated spotlights

Dimmable LED strips

USB sockets

Bluetooth sound system

Design buttons

## Lighting

-  Dimmable LED strip with direct (warm) white lighting
-  Dimmable LED strip with direct white lighting: adjustable cool - warm white
-  Indirect RGB lighting
-  Dimmable spotlights
-  Dimmable LED Starlight

## USB- & 230V- sockets

USB and 230V sockets are included in the Pergola SO! "Chic" and "Star" packs. That way you're assured of having every comfort at your fingertips. Just as if you're seated in your living room.

## Push-buttons

It's always easy to operate the screens, lighting and louvers thanks to the integrated push buttons in one or more leg poles of your Pergola SO!. The buttons are also illuminated and waterproof to give you extra ease of use.
