

# SO! Cocoon Combi

Your seasonal  
garden room

*winsol*

# Discover the new roof: Cocoon

## Specially made for you

The SO! garden room or summer house is ready for you and your family, and designed to fit your needs and wishes. You can choose from **3 roof types**, each with its own characteristics and advantages.

- ▶ **Classic**  
The water-resistant louvre with solar shading
- ▶ **Climate**  
The sound-insulating louvre that is not just water-resistant but also completely wind-resistant
- ▶ **Cocoon**  
A fixed insulated roof made of real wood that is 100% resistant to wind and water

Want to link 2 modules? This **Combi** is also possible!

Furthermore, you can also design your exterior living space with our **insulating double-glazing glass walls** or the **Cocoon wall made of natural wood**. Or choose one of our other decorative walls. Find out more from page 28 onward.

Welcome to  
your world  
of customisation.

Wood, louvres or a combination? You choose!

# The insulating Cocoon roof

The heat stays inside,  
the cold outside.

## The roof: 3 choices

### Double-walled Classic louvres

The Classic louvres provide protection against the sun's UV rays and, when tilted, also allow the wind to pass through. Create your own microclimate, even when it rains or snows heavily.

### Windproof and insulating Climate louvres

Shade or light under the louvred roof? You can determine this yourself by opening or closing the aluminium louvres. Or you can opt for the automatic motor that takes over the controls for you. So convenient!

- ▶ When closed, the louvres connect perfectly to the gutter for a **completely windproof seal**
- ▶ **Sound-insulating**, which makes the tapping of the rain sound much quieter\*
- ▶ Waterproof with integrated and discreet rain runoff

### Cocoon: the warmth and cosiness of wood

Choose one of the **three shades of poplar wood** and create a pleasant atmosphere under the wooden roof with a LED light strip, spotlights or a starry sky. A fixed roof gives you a protected and snug feeling, just like in your home.

- ▶ **Airtight** thanks to the roof insulation
- ▶ Stable indoor temperature thanks to matching glass walls with double glazing and built-in screens
- ▶ Waterproof with integrated and discreet rain runoff

### Or a combination of different roofs?

Combine the best of both worlds and opt for the shelter and security of our wooden roof and the louvres that tilt completely autonomously.

This combination creates an outdoor living room space where you enjoy from early morning until late at night. And all year round, regardless of the weather.

(\*) The Climate louvre is also available without the sound insulation

More information about Climate louvres

# Ready to start cocooning?

Your cosy nest where you can feel really at home.

Seclude yourself from the rest of the world for a while in your own safe cocoon. Away from all the hustle and bustle, you feel the stress ebbing away. **Under the SO! summer house, you're really at home.** Pure enjoyment on your own patio or in your garden with all the comfort of your living room.

This space is much more than just a pergola. It's a **different way of living outdoors** and being with your family, friends and relatives.

Discover that unique **indoor feeling** and experience **wonderful moments** again and again – today, tomorrow and every day after that.

# More space to be yourself

Imagine... An extra room with **so many possibilities** that it becomes almost unreal. And yet, thanks to a SO! solution with a wooden and/or louvred roof and real insulating (sliding) windows, this is now all within reach.

Be inspired by our **Cocoon spaces** on the following pages. Which is your favourite?

## Poolhouse

Live and enjoy life to the fullest. And this at your own pace, together with everyone you love. Your SO! poolhouse is ready whenever you need it as an entertainment or me-time room!

▶ From page 10

## Garden room

Imagine more living space outside on the terrace, yet with all the indoor comforts. This hybrid and modern living solution attached to your home guarantees so many happy moments. All year round.

▶ From page 14

## Hospitality sector

What if you could create the perfect setting for so many lovely table moments in your restaurant or bar? This terrace extension with all the trimmings is the ultimate in exclusive enjoyment.

▶ From page 16

## Outdoor office

Work or do your hobbies in peace and quiet – but still in your own familiar and green environment. Clear your head and express your energy, focus and creativity to the fullest.

▶ From page 18

# Poolhouse

## On holiday in your own garden

### So many memorable moments, together or by yourself

Want to receive and entertain guests in a fantastic setting? Your SO! garden room or modern pool house gives you a wealth of options, from an open roof to a completely enclosed room where the **heat stays inside or - if you wish - outside.**

It is the ideal place to have a barbecue, unwind during a meditation session or relax in the jacuzzi with the necessary **privacy** after a busy day at work.

### The luxury you might expect

Shelter and at the same time protection against the UV rays of the sun. A secure feeling but still in the healthy open air. Built-in lighting, speakers, sockets and more... Our pool house or luxurious garden room has **everything you need.**

### Configuration of this pool house (photo on the left)

Features	Module 1 (6 x 4 m)	Module 2 (6 x 4 m)

# Pool house

## Countless possibilities and configurations

A bespoke design for every garden room. Our SO! outdoor spaces are very modular, and we can alternate different roof types in one big structure. Some examples...

### 01 Outdoor kitchen for delicious cooking or barbecuing

Modules: 6 x 4 m

### 02 An extra living room to relax in the open air

Modules: 6 x 4 m

### 03 A wellness area to unwind

Modules: 6 x 4 m

### 04 Now it's up to you! Feel free to dream, because no idea is too crazy.

Modules: 6 x 4 m

We'd love to hear how you'd like to design your SO! space. Or brainstorm with our advisers at a Winsol point of sale near you. We hope to see you soon!

# Summer & winter garden house

## Extra indoor and outdoor living space

### Peranda = pergola + veranda

A Peranda is a **hybrid lifestyle solution** somewhere between a pergola and veranda. This garden room **keeps the heat inside or outside** more effectively than a standard built-on pergola. The **insulated Cocoon roof** and the **insulating double-glazing glass walls** do the job.

### Invite your garden into your home. And vice versa.

Your Peranda will become **part of your home**. An extra living space in which you can completely relax and enjoy your me-time moments with a good book or fun playtime with your little ones. Thus, **a family space** to be proud of.

And don't worry, your household effects are also **protected against burglary** because you can just **close** the sliding window like the exterior doors of your home.

Configuration of this Peranda (photo on the right)

Features	Module (6 x 4 m)								
Function module	Lounge area								
Colour	Jet black RAL 9005 ST								
Roof type	<b>Cocoon</b>								
Decorative walls *	<table border="1"> <tr> <td>F</td> <td>Sliding aluminium double-glazed window</td> </tr> <tr> <td>B</td> <td>Sliding aluminium double-glazed window with curtains</td> </tr> <tr> <td>L</td> <td>Fixed aluminium double-glazed window</td> </tr> <tr> <td>R</td> <td>Building wall</td> </tr> </table>	F	Sliding aluminium double-glazed window	B	Sliding aluminium double-glazed window with curtains	L	Fixed aluminium double-glazed window	R	Building wall

The best of a veranda/  
conservatory with a  
pleasant indoor climate  
during summer.

# Hospitality sector

## A terrace for all seasons

### Happy guests = pure satisfaction

As a pub, restaurant or hotel owner, your guests or visitors come first. And of course you want to serve them in the best way possible. With glass walls or closures, you can significantly **increase the comfort level on your terrace** in all seasons. These walls not only give you **panoramic views** – they also **provide shelter** from the cold, rain and wind.

### Large seating areas

Expand your available outdoor seating space through a SO! solution with different linked modules. The wooden Cocoon roof and the sound-insulating Climate louvres also provide **extra wind and water resistance**. And thanks to atmospheric LED lighting and great music, you can give your customers a **top-class experience** that will linger in their memories for a long time.

Configuration of this restaurant module (photo on the left)

Features	Module 1 (4 x 4 m)	Module 2 (4 x 4 m)	Module 3 (4 x 4 m)
Function module	Dining area		
Colour	Anthracite grey RAL 7016 ST

	B	-	Perspective "guillotine" window
	L	Perspective "guillotine" window	Sliding aluminium double-glazed window
	R	Building wall	Building wall
Lighting	LED strip	LED strip, starry sky	LED strip

(\*) F: front, B: back, L: left side, R: right side

Working with the sun on your face without that annoying reflection on the screen.

# Outdoor office

## A separate hobby or working space

### Let your creativity flow in a green environment

Create the optimal work-life balance thanks to an **extra space** in which you can work or do your hobbies, such as yoga or fitness. Away from the hustle and bustle of the daily household but still at home in your **familiar surroundings**.

### Advantages

We have thought of everything for your outdoor office or garden studio: **insulated** thanks to the wooden Cocoon roof or the Climate louvres and the double-glazed windows, but also with LED lighting, speakers for good music and, of course, a power supply with built-in USB connections and sockets.

And above all **safe**, because you can lock the sliding window when the day is done.

### Configuration of this garden office (photo on the left)

Features	Module (4 x 3 m)
Function module	Studio/office
Colour	Jet black RAL 9005 ST
Roof type	<b>Cocoon</b>
Decorative walls*	F Sliding aluminium double-glazed window
	B Fixed wooden Cocoon wall
	L Fixed steel-look aluminium double-glazed window with built-in SolFix screen
	R Fixed steel-look aluminium double-glazed window with built-in SolFix screen
Lighting	LED strip, built-in spotlights

(\*) F: front, B: back, L: left side, R: right side

### Lighting for every occasion

With our built-in LED lighting, you can always create the **perfect atmosphere** under your SO!. From bright white when you want to quietly read a book to warm white for a dinner party or even festive coloured lights.

-  Dimmable LED strip with direct (warm) white light (all-round)
-  Dimmable LED strip with direct white light: adjustable cold-warm (all-round)
-  Indirect RGB light (all-round)
-  Dimmable spots in the side-beams, roof and/or louvres
-  Dimmable LED starry sky in the roof and/or louvres

### Dreamy starry sky

What if you could also enjoy a starry sky inside your garden room? The small LED lights in the roof give your outdoor space **extra flair** and create a wonderful dreamy glow.

### In any colour that you desire

Do you want light in your favourite colour? Then go for the **RGB LED strips**, which give you a staggering 16.7 million colours to choose from.

Date night? How about a romantic red glow? Or choose a relaxing shade of purple for painting or practising yoga and orange for a cosy aperitif with friends.

Choose your favourite colour for the evening.

## Modern comforts, always nearby

### Heating

The wooden Cocoon roof and the insulating glass and sliding walls retain the sun's heat longer in your SO! garden room.

Should it be a little warmer during the colder months? The powerful 3000W infra-red heating makes a world of difference in **just a few minutes**.

### USB and 230V connections

No Winsol garden room is without the connections you need to charge your laptop or smartphone or power your outdoor kitchen and bar.

These connections are **neatly incorporated into the leg poles** and are also waterproof and resistant to dirt and vermin.

### Bluetooth sound system

Subtly integrated speakers with a surprisingly powerful and clear sound? Check! We **integrate the speakers** almost invisibly into the leg poles. Stream your favourite tunes from your smartphone with Bluetooth. Ready for a small party with surround sound?

Check out our Spotify playlists:  
**Winsol Aperol** for a long, cosy evening  
**Winsol Sunset** for a great party

Extra warmth  
as evening  
falls.

## How to control? Piece of cake!

### With your smartphone or tablet

Stay comfortably seated while you control the lighting or the screens. Just use your smartphone or tablet to easily open the **Casambi app**, where you can find all the settings.

Do you have a SO! with a louvred roof? Then your smartphone is even more practical because you can also use it to tilt or close the louvres.

### With the built-in push buttons

Do you want to avoid using your smartphone during your Zen moment? Then use the built-in **push buttons** in the leg poles. Stay away from the possible hassle with remote controls that get lost just when you need them – the **push buttons are always close at hand**.

There is a ring of LED lighting around the **buttons** that makes it easy to see them in the dark. And they are also waterproof. This means you can safely lower the screens with wet hands after a splash in the pool to dry off or change clothes in complete privacy.

Connect your smartphone with Bluetooth and enjoy.

Motorised Ambiente louvred wall

Verso-TEX sliding wall with double screen fabric

Wooden sliding wall

## Create your cocoon of peace and happiness

Protect yourself from the weather and close off your SO! garden room on all sides with our **insulating glass and sliding walls**. Combine them with **built-in SolFix screens** as solar shading that prevents overheating.

Discover all the options on the next pages.

Maintain the contact with your garden.

## Sliding aluminium double-glazed window

### Stay in contact with your garden

With the sliding window, you create your own outdoor space in which you can sit comfortably **all year round in every type of weather**. And this with optimal daylight and a view of the garden or your surroundings. Slide open the sliding window and the boundary between indoors and outdoors blurs. Combine with **curtains** for a real living-room feeling.

### Insulating glazing

The aluminium carpentry with **double glazing** guarantees optimum heat and sound insulation and can be opened for ventilation, of course.

Also available with:

- ▶ Single glazing
- ▶ Integrated lock to close the sliding window

## Fixed aluminium double-glazed window

### Unobstructed view with shelter

Enjoy panoramic views thanks to the aluminium window that stretches from the floor to the roof. The **double glazing** combines thermal insulation with a modern and streamlined design. Keep in contact with your garden and stay warm in the winter with **top-quality aluminium exterior** joinery.

### Built-in solar shading

Large windows let in lots of sunlight and heat. So in the summer you can use **built-in weather-resistant screens** to regulate the temperature and avoid the **greenhouse effect** under your SO!. Curtains on the inside create an extra decorative touch and/or also ensure that the neighbours cannot see inside.

That distinctive look  
and an excellent  
insulation combined.

## Fixed steel-look aluminium double-glazed window

### Authentic look

Steel-look is currently very popular, both in homes and in extensions and pool houses. The **three-dimensional or bevelled aluminium bars on the glass** provide that typical characteristic cottage look. We also paint the bars in the **same colour** as the frame to create a harmonised look.

### Double glazing with solar shading

This multi-panel glass closure stands for **optimal insulation** of your exterior room with a visual design touch. Combine your fixed glass window with **built-in SolFix screens** to keep out the heat of the sun.

## Cocoon wall with natural wood

### Authenticity and the natural look of wood

Immerse yourself in a safe and cosy atmosphere with the scent of **natural wood**. The Cocoon wall made of **low-maintenance and durable poplar wood** is a real showstopper and offers **absolute privacy**. Enjoy the link with nature and choose from one of the **3 real wood colours**.

### Customise as you wish

Do you want more daylight under your pergola? Then equip your Cocoon wall with a **see-through** window with the width of 2 wooden louvres. The window is discreetly built into the wall and provides an **ocean of light**.

You can also further personalise your wooden wall with the **integrated LED strips** with adjustable white light.

## Built-in SolFix screens

Choose from  
42 more  
colours

### Windproof solar shading

Avoid overheating and that well-known 'conservatory effect' during hot days by using neatly built-in screens in the structure of your SO! garden room. The lowered fabric **blocks up to 85% of the sun's heat** without completely darkening the space.

### Privacy and a view of your surroundings at the same time

Choose from **more than 50 fabric colours and different transparencies**, allowing the fabric to let through more or less light. The transparency of the fabric also regulates the level of privacy.

Combine the SolFix screens **along the same side** with:

- ▶ Fixed double-glazed window
- ▶ Fixed steel-look double-glazed window

# Other closures

Purely practical, a 'feature wall' or an extra touch of cosiness

## Focus on shelter and design

Is the insulating aspect less important for you or are you looking for a wall that visually stands out a bit more?

See opposite for our other decorative walls that will make any pergola complete.

Slide to the side

Slide up/down

Rotating vertical louvres

1. Glass sliding wall, single glazing with or without steel-look finish
2. Motorised Ambiente louvred wall
3. Verso-TEX sliding wall with double screen fabric
4. Wooden sliding wall with screen fabric
5. Perspective "guillotine" glass wall
6. Outdoor curtains

More info? Scan the QR code and find out more about our pergola closures.

# Your SO!, your style

Contemporary, minimalist,  
classic, romantic, rural,  
industrial or just your own  
unique style...

We adapt your garden room completely to your wishes, so it becomes one of a kind with your personal twist.

## Modern & minimalist

## Romantic & homey

## Country & cottage

# Difficult to choose?

The SO! outdoor living space of your dreams in six steps.

## Step 1: configuration

Attached to the house, freestanding or fully built-in without leg poles. Get the most out of your new garden room by linking different SO! modules together. This way you create **one large indoor and outdoor living space** where you can easily define zones for the lounge area or the outdoor kitchen and dining table, for example.

1, 2, 3 or more modules. Everything is possible.

1. Built-in roof
2. Freestanding
3. Freestanding with overhang
4. Linked modules (width or length)
5. 4 linked modules (star-shape)
6. Attached
7. Attached with door pole
8. Attached with overhang

## Step 2: roof

Would you prefer the warmth and cosiness of a **real wooden roof** or a **louvred roof** where you can regulate the amount of shade yourself? Or a **combination** of modules linked together, with one part wood, the other louvres?

**Cocoon – Fixed roof made of real wood**  
3 colours: natural, grey or black

**Windproof Climate louvres**  
Every RAL colour or 3 wood-look colours  
Optional: acoustically insulated

**Classic louvres**  
Every RAL colour or 3 wood-look colours

## Step 3: closures

Walls or closures not only provide shelter from the weather elements, they also help you feel safe and secure. See the full overview on the next page.

**Insulated glass walls**  
The **double glazing** helps to keep in the heat more efficiently, just as aluminium exterior joinery does in your home.

**Non-insulated decorative walls**  
These walls provide shelter, privacy and solar shading, but they have no insulating properties. Or go for the Cocoon wall made of real wood for an extra cosy touch.

**Combination of different walls**  
You can also combine your insulated double-glazing windows with integrated screens as solar shading or with outdoor curtains. And this is even possible **on the same side**. Or mix and match and choose different partitions for your garden room, such as the Ambiente louvre wall as a feature wall, supplemented with a sliding window and screens.

**No walls**  
Of course, it is also possible to choose a configuration without walls. Some walls can also be installed afterwards.

## Step 4: style

Which would you prefer: a pool house with a streamlined and modern look without too many frills or a cosy, homely cocoon? Or would you rather go for the rural touch by combining black, wood and steel-look?

Have a look at the previous pages for more information.

**Modern & minimalist**

**Romantic & homey**

**Country & cottage**

## Step 5: colour

Say it with colour. Besides the roof, you can also decide to change the colour of the aluminium structure.

**Frame**  
Choose one of the 3 standard colours or a RAL colour of your choice.

**Aluminium (sliding) windows**  
And we also match the frame of the walls with the colour of the roof.

## Step 6: comfort

Is the standard control by smartphone enough or would you like to have the extra push buttons? And what about the lighting or extras such as speakers, power sockets and heating?

The fastest way to choose options? Check out our **Cosy, Chic and Star packs** on the next page. Or choose your options à la carte.
